

COSA Q

Costing and Production System for the Printing and Manufacturing Industries

- **Modular Architecture**, Estimates, Sales Orders, Works Orders, WIP
- **Estimate and Produce** signs, logos, posters, tools, structures, on any machine (flat-bed, sheet/reel), any material (paper, cloth, metal, etc)
- **Flexible Sequential Process Control** with default templates, machines and designs
- **Schedule & Plan Jobs** to earliest week with available 'load' capacity
- **Convert** Estimates to Sales Orders to Works Orders
- **Drill Down** from Works Orders to Estimates. Retain Historical Information
- **Transfer** finished goods to Stock
- **Allocate Costs** to Cost Centres and Activities for labour and materials
- **Timesheets** to Direct and Indirect Activities
- **Management Reports**, Production Analysis

**END USER: FROM £800,
DEPENDING ON MODULE/USERS**

Product Construction Screen

The system manages default process constructions, designs, raw materials (Pantone inks, screens, adhesives, etc) for regular use on estimates and production.

Multi-head printing, gloss/matt finish, four colour processing.

“Process Control” manufacturing in general.

Load Ledger (WIP) Screen

Jobs are automatically planned to the earliest available week/machine ‘loading’ combination.

Schedule and move at will estimates, orders and jobs around the ‘Load System’ with planning flexibility and control.

User defined costings for automatic calculations of costs with manual fine-tuning for spoilage, overs, etc.
